General Intelligence and Reasoning

1. **Answer: (A)**
The logic followed here is as follows:
- | | | |
|----|----|----|
| T | A | G |
| -7 | -5 | -3 |
| M | V | D |
| -7 | -5 | -3 |
| F | Q | A |
| -7 | -5 | -3 |
| Y | L | X |
| -7 | -5 | -3 |
| R | G | U |
| -7 | -5 | -3 |
| K | B | R |
- So, 'FQA' is the missing term in the given series.
2. **Answer: (C)**
Given expression:
64 R 2 Q 4 S 28 P 13
After replacing the letters with signs, we get
 $64 \div 2 \times 4 + 28 - 13$
 $= 32 \times 4 + 28 - 13$
 $= 128 + 28 - 13$
 $= 156 - 13$
 $= 143$
So, the value of the given expression is '143'.
3. **Answer: (B)**
The pattern followed here is:
In each column:
Third number = First number + (Second Number)²
In 1st column:
Third number = 27 + (7)²
Third number = 27 + 49 = 76
In 2nd column:
Third number = 14 + (11)²
Third number = 14 + 121 = 135
Similarly, in 3rd column:
Third number = 32 + (13)²
Third number = 32 + 169 = 201
So, '201' will come in place of question mark.
4. **Answer: (D)**
Among the given options, only Tiger is a carnivore.
5. **Answer: (B)**
Given equation: $121 * 11 * 40 * 2 * 4 * 21 * 10$
After replacing '*' with mathematical sign given in option 'A' we get:
 $121 \div 11 \times 40 \div 2 + 4 \times 21 = 10$
 $11 \times 20 + 4 \times 21 = 10$
 $220 + 84 = 10$
 $304 \neq 10$
So, signs given in option 'A' will not balance the equation.
After replacing '*' with mathematical sign given in option 'B' we get:
 $121 \div 11 + 40 \times 2 \div 4 - 21 = 10$
 $11 + 40 \times 0.5 - 21 = 10$
 $11 + 20 - 21 = 10$
 $31 - 21 = 10$
 $10 = 10$
So, signs given in option 'B' will balance the equation.
After replacing '*' with mathematical sign given in option 'C' we get:
 $121 + 11 - 40 \div 2 \div 4 + 21 = 10$
 $121 + 11 - 5 + 21 = 10$
 $153 - 5 = 10$
 $148 \neq 10$

So, signs given in option 'C' will not balance the equation.

After replacing '*' with mathematical sign given in option 'D' we get:

$$121 - 11 \times 40 \div 2 + 4 = 21 \times 10$$

$$121 - 11 \times 20 + 4 = 210$$

$$121 - 220 + 4 = 210$$

$$125 - 220 = 210$$

$$-95 \neq 210$$

So, signs given in option 'D' will not balance the equation.

6. **Answer: A**
Correct sequence is:
A / A B / A B C / A B C D / A B C D E
7. **Answer: (C)**

The unfolded paper piece is shown below:

8. **Answer: (A)**
Shilpa said, "She is the daughter of my husband's wife." In this case, Shilpa is referring to herself as her husband's wife. So, the girl is Shilpa's daughter. The question asks how Shilpa's son is related to that girl. Since the girl is Shilpa's daughter, the relation between Shilpa's son and the girl is that of siblings. Therefore, the girl's brother is Shilpa's son.
9. **Answer: (B)**
There are 10 bats, which are neither Bail nor Pitch.
10. **Answer: (B)**
The logic followed here is third number is the difference between the cube of first number and square of second number.
Third number = (First number)³ - (second number)²
In (7, 5, 318)
 $318 = 7^3 - 5^2$
 $318 = 343 - 25$
 $318 = 318$
In (12, 8, 1664)
 $1644 = 12^3 - 8^2$
 $1644 = 1728 - 64$
 $1644 = 1664$
In option 'a': (8, 6, 486)
 $486 = 8^3 - 6^2$
 $486 = 512 - 36$
 $486 \neq 476$
In option 'b': (9, 11, 608)
 $608 = 9^3 - 11^2$
 $608 = 729 - 121$
 $608 = 608$
In option 'c': (10, 13, 881)
 $881 = 10^3 - 13^2$
 $881 = 1000 - 169$
 $881 \neq 831$
In option 'd': (6, 4, 190)
 $190 = 6^3 - 4^2$
 $190 = 216 - 16$
 $190 \neq 200$
11. **Answer: (C)**
The embedded figure is shown below:

12. **Answer: (A)**

The patten followed here is as follows:
First, all the consonants of the word are changed to its place value as per the English alphabetical series and all the vowels are changed to the place value of opposite letter as per the English alphabetical series and then, they are written in reverse order as show below.

In 'NOTABLE':

N	O	T	A	B	L	E
14	12	20	26	2	12	22
22	12	2	26	20	12	14

So, 'NOTABLE' is coded as '2212226201214'.

In 'MINTOS':

M	I	N	T	O	S
13	18	14	20	12	19
19	12	20	14	18	13

So, 'MINTOS' is coded as '191220141813'.

Similarly, in 'PLUMBER':

P	L	U	M	B	E	R
16	12	6	13	2	22	18
18	22	2	13	6	12	16

So, 'PLUMBER' is coded as '182221361216'.

13. **Answer: (B)**

The correct arrangement of the given words in the order in which they appear in an English dictionary is:
1- Jealousy, 3- Jeopardy, 5- Jersey, 4- Jetliners, 2- Jets

So, '1, 3, 5, 4, 2' is the correct dictionary order of the following words.

14. **Answer: (A)**

Here @ means 'x' and % means '-'

In, $12 @ 4 \% 17 = 31$

$12 \times 4 - 17 = 31$

$48 - 17 = 31$

In, $56 \% 8 @ 5 = 16$

$56 - 8 \times 5 = 16$

$56 - 40 = 16$

$16 = 16$

Similarly, $14 @ 7 \% 38 = ?$

$14 \times 7 - 38 = ?$

$98 - 38 = 60$

15. **Answer: (D)**

Conclusions:

I. All Watch are Digital: Doesn't follow (As, there is no direct relation between Watch and Analog. So, no definite conclusions follow)

II. No Digital are Watch: Doesn't follow (As, there is no direct relation between Watch and Analog. So, no definite conclusions follow)

III. Some Watch are not Digital: Follows (As, some Watch are Analog and no Analog are Digital. So, those Watch, which are Analog can never be Digital)

So, only conclusion III follows.

16. **Answer: (C)**

17. **Answer: (C)**

Given: GET, LBY, QYD, VVI, ASN, FPS, [?]

The logic followed here is as follows:

$G + 5 = L$, $L + 5 = Q$, $Q + 5 = V$, $V + 5 = A$, $A + 5 = F$, $F + 5 = K$

$E - 3 = B$, $B - 3 = Y$, $Y - 3 = V$, $V - 3 = S$, $S - 3 = P$, $P - 3 = M$

$T + 5 = Y$, $Y + 5 = D$, $D + 5 = I$, $I + 5 = N$, $N + 5 = S$, $S + 5 = X$

So, 'KMX' will replace the question mark in the given series.

The complete series is as follows:

GET, LBY, QYD, VVI, ASN, FPS, **KMX**

18. **Answer: (B)**

The mirror image is shown below:

19. **Answer: (C)**

The logic followed here is as follows:

Second number = (Sum of the digits of first number) × (difference of the digits of first number)

In option 'a', '82: 60':

Second number = $(8 + 2) \times (8 - 2)$

Second number = 10×6

Second number = 60

In option 'b', '61: 35':

Second number = $(6 + 1) \times (6 - 1)$

Second number = 7×5

Second number = 35

In option 'c', '56: 21':

Second number = $(5 + 6) \times (6 - 5)$

Second number = 11×1

Second number = 11 ≠ 21

In option 'd', '13: 8':

Second number = $(1 + 3) \times (3 - 1)$

Second number = 4×2

Second number = 8

20. **Answer: (D)**

The pattern followed here is as follows:

First, all the letters of the given word are changed to 3rd succeeding letter, as per English alphabetical series, and then they are arranged in reverse order.

In 'ZEBRAS':

Z	E	B	R	A	S
C	H	E	U	D	V
V	D	U	E	H	C

So, 'ZEBRAS' is coded as 'VDUEHC'.

In 'MOLTEN':

M	O	L	T	E	N
P	R	O	W	H	Q
Q	H	W	O	R	P

So, 'MOLTEN' is coded as 'QHWORP'.

Similarly, in 'PRODUCE',

P	R	O	D	U	C	E
S	U	R	G	X	F	H
H	F	X	G	R	U	S

So, 'PRODUCE' is coded as 'HFXGRUS'.

21. **Answer: (C)**
The logic followed here is as follows:
'Yen' is currency of 'Japan'. Similarly, 'Ruble' is currency of 'Russia'.

Triangles in the figure: PEF, PEO, POF, FON, OAB, ONP, NPJ, JPG, JCK, GHC, MHL, MDC, NKM.
So, there are 13 triangles in the given figure.

23. **Answer: (C)**
The logic followed here is as follows:

In option 'A', '4560 - 2310':
= 4560 - 2250
= 2310

LHS = RHS

In option 'B', '8970 - 6720':
= 8970 - 2250
= 6720

LHS = RHS

In option 'C', '7650 - 5300':
= 7650 - 2250
= 5400

LHS \neq RHS

In option 'D', '9480 - 7230':
= 9480 - 2250
= 7230

LHS = RHS

So, '7650 - 5300' is the odd pair.

24. **Answer: (C)**
The logic followed here is:
The square of the consecutive number in the number series is the next number starting from '8'.

$$8^2 = 64$$

$$9^2 = 81$$

$$10^2 = 100$$

$$11^2 = 121$$

$$12^2 = 144$$

$$13^2 = 169$$

$$14^2 = 196$$

So, '121' will come in place of question mark. The complete series is:

64, 81, 100, **121**, 144, 169, 196

25. **Answer: (A)**
On taking the faces in clockwise direction from '3',
In dice [a]: '3, 5, 1'
In dice [b]: '3, 2, 4'
So, '5' is opposite to '2', '1' is opposite to '4'. Thus '3' is opposite to '6'.
If the dice is resting on '1' then the number that will be on the top is '4'.

Quantitative Aptitude

26. **Answer: (C)**
Total selling price of cans = $(10 \times 450 \times 1.16) + (4 \times 450 \times 1.2) + (6 \times 504) = 5220 + 2160 + 3024 = ₹10,404$
And, total cost price = $450 \times 20 = ₹9,000$
So, profit earned = $10404 - 9000 = ₹1,404$

27. **Answer: (B)**

Let 'O' be the centre of the two circles and $OP \perp$ on ABCD

OC is the radius of the smaller circle

So, $OC = 13$ cm

OD is the radius of the larger circle

So, $OD = 15$ cm

We, have, $\angle OPC = 90^\circ$

$BP = PC = (BC/2) = 5$ cm {Since, a line drawn from the centre of the circle is perpendicular bisector of the chord}

In triangle OCP, using Pythagoras theorem

$$OP = \sqrt{OC^2 - PC^2} = \sqrt{13^2 - 5^2} = \sqrt{169 - 25} = \sqrt{144} = 12 \text{ cm}$$

As $\angle OPC = 90^\circ$

So, $AP = PD = (AD/2)$ {Since, a line drawn from the centre of the circle is perpendicular bisector of the chord}

Now, In triangle OPD, using Pythagoras theorem

$$PD = \sqrt{OD^2 - OP^2} = \sqrt{15^2 - 12^2}$$

$$= \sqrt{225 - 144} = \sqrt{81} = 9 \text{ cm}$$

So, $AD = 2 \times 9 = 18$ cm

28. **Answer: (B)**

Let the present age of 'A' be '5x' years

So, present age of 'C' = $5x \times (8/5) = '8x'$ years

Present age of 'B' = $1.2 \times 5x = '6x'$ years

ATQ;

$$6x + 8 = 8x$$

$$\text{Or, } 8 = 2x$$

$$\text{So, } x = 4$$

So, present age of 'A' = $5 \times 4 = 20$ years

And present age of 'B' = $20 \times 1.2 = 24$ years

29. **Answer: (A)**

Let the total work be '60x' units.

Efficiency of Aman = $60x \div 12 = 5x$ units/day

Efficiency of Ayush = $60x \div 10 = 6x$ units/day

Required difference = $6600 \times \{(6x - 5x) \div 11x\} = 6600 \times (1/11) = ₹600$

30. **Answer: (D)**

$$\text{Given, } x + \frac{1}{x} = 5\sqrt{5}$$

On squaring both sides, we have;

$$x^2 + \frac{1}{x^2} + 2 \times x \times \frac{1}{x} = 125$$

$$x^2 + \frac{1}{x^2} = 123$$

Now, on subtracting 2 from both sides, we have;

$$x^2 + \frac{1}{x^2} - 2 = 121$$

$$\left(x - \frac{1}{x}\right)^2 = 121$$

$$x - \frac{1}{x} = 11$$

$$\text{So, required value} = x^2 - \frac{1}{x^2} = \left(x - \frac{1}{x}\right) \left(x + \frac{1}{x}\right)$$

$$= 5\sqrt{5} \times 11 = 55\sqrt{5}$$

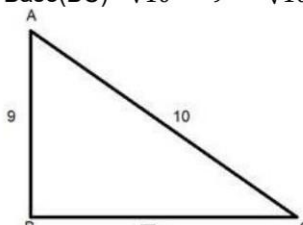

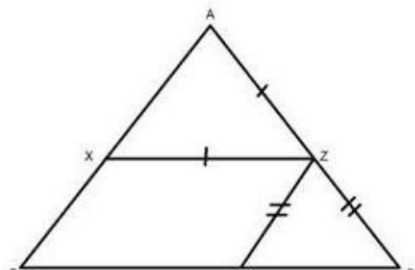

31. **Answer: (C)**
Sum of 12 number = $52 \times 12 = 624$
Sum of 11 number after removing one number = $55 \times 11 = 605$
The number which was removed = $624 - 605 = 19$
32. **Answer: (A)**
We know, simple interest
$$= \frac{\text{Principal} \times \text{Time} \times \text{Rate}}{100}$$

So, simple interest received
$$= \frac{12500 \times 12.5 \times 2}{100} = ₹3,125$$
33. **Answer: (B)**
Let the marked price of the TV be ₹'100x'.
So, selling price of the TV = $100x \times 0.82 = ₹82x'$
ATQ,
 $82x = 5330$
So, 'x' = 65
So, marked price of the TV = $100x = 100 \times 65 = ₹6,500$
34. **Answer: (C)**
Let the speed of the man and usual time taken be 'x' km/minutes and 't' minutes, respectively.
ATQ,
 $x \times t = 1.4x \times (t - 16)$
Or, 't' = $1.4t - 22.4$
Or, $0.4t = 22.4$
So, 't' = 56
35. **Answer: (A)**
Let the radius and height of the cylinder be 'r' cm and 'h' cm, respectively.
So, curved area of the cylinder = $2\pi rh$
Or, $440 = 2 \times (22/7) \times r \times 10$
So, 'r' = 7
So, volume of the cylinder = $\pi r^2 h = (22/7) \times 7 \times 7 \times 10 = 1540 \text{ cm}^3$
36. **Answer: (A)**
 $(240 \div 8) \div 49 \times 7^3 + 9 \text{ of } 9 \times 9 \div 3 \text{ of } 27$
 $= 30 \div 49 \times 343 + 81 \times 9 \div 81$
 $= 30 \times 7 + 9$
 $= 210 + 9$
 $= 219$
37. **Answer: (C)**
Required percentage = $\frac{120+160}{150+170} \times 100 = \frac{280}{320} \times 100 = 87.5\%$
38. **Answer: (C)**
In right triangle ABC, we have
 $\cos 45^\circ = \frac{\text{base}}{\text{hypotenusus}} = \frac{AB}{6\sqrt{2}}$
 $\frac{1}{\sqrt{2}} = \frac{AB}{6\sqrt{2}}$
Or,
So, AB = 6 cm
39. **Answer: (A)**
We know that, if the sum of the digits of a number is divisible by 9, then the number will be divisible by 9.
Hence, Sum of digits of the number = $5 + 4 + 8 + 2 + X + 5 + 5 = 29 + X$
Since, 36 is divisible by 9, then if we add 7 in the digits of the number given above, then it will be divisible by 9.
So, $29 + X = 36$
So, 'X' = 7
40. **Answer: (D)**
Sum of income of the company in year 'Y4' and 'Y5' = $600 + 520 = ₹1,120$ crores
Sum of expenditure of the company in year 'Y1' and 'Y3' = $320 + 240 = ₹560$ crores

Required percentage = $\{(1120 - 560)/560\} \times 100 = 100\%$

41. **Answer: (A)**
Formula, $(a + b)^2 = a^2 + b^2 + 2ab$
$$\left(\frac{x}{y} + \frac{y}{x}\right)^2 = \frac{x^2}{y^2} + \frac{y^2}{x^2} + 2 \times \frac{x}{y} \times \frac{y}{x}$$

Or, $\left(\frac{x}{y} + \frac{y}{x}\right)^2 = 62 + 2$
Or, $\left(\frac{x}{y} + \frac{y}{x}\right)^2 = 64$
So, $\frac{x}{y} + \frac{y}{x} = 8$
Cubing both sides, we have
So, $\left(\frac{x}{y} + \frac{y}{x}\right)^3 = 512$
Using $(a + b)^3 = a^3 + b^3 + 3ab(a + b)$
$$\frac{x^3}{y^3} + \frac{y^3}{x^3} + 3 \times \left(\frac{x}{y} \times \frac{y}{x}\right) \times \left(\frac{x}{y} + \frac{y}{x}\right) = 512$$

Or, $\frac{x^3}{y^3} + \frac{y^3}{x^2} + 3 \times 8 = 512$
So, $\frac{x^2}{y^2} + \frac{y^2}{x^2} = 512 - 24 = 488$
42. **Answer: (C)**
Total marks of Aditya = $600 \times 0.94 = 564$
Actual marks obtained by Aditya = $564 - 85 - 65 + 58 + 56 = 678 - 150 = 528$
So, required percentage = $\frac{528}{600} \times 100 = 88\%$
43. **Answer: (D)**
Given, $\sin C = \frac{\text{perpendicular}}{\text{hypotenusus}} = \frac{9}{10}$
Therefore,
Base(BC) = $\sqrt{10^2 - 9^2} = \sqrt{100 - 81} = \sqrt{19}$
- 
- $\text{cosec}^2 A = \left(\frac{\text{hypotenusus}}{\text{perpendicular}}\right)^2 = \left(\frac{AC}{BC}\right)^2 = \left(\frac{10}{\sqrt{19}}\right)^2 = \frac{100}{19}$
44. **Answer: (A)**
- 
- In triangle AXZ,
As AZ = XZ
So, $\angle XAZ = \angle ZXA = 60^\circ$ (Angles opposite to equal sides are equal)
So, $\angle XZA = 180^\circ - (60^\circ + 60^\circ) = 60^\circ$ (Sum of interior angles of a triangle is 180°)
Again, in triangle ZCY
As ZC = ZY
 $\angle ZYC = \angle ZCY = 80^\circ$ (Angles opposite to equal sides are equal)

So, $\angle YZC = 180^\circ - (80^\circ + 80^\circ) = 20^\circ$ (Sum of interior angles of a triangle are equal)

Now,

$XZY + (\angle XZA + \angle YZC) = 180^\circ$ (Angle made by a straight line is 180°)

$XZY = 180^\circ - (\angle XZA + \angle YZC) = 180^\circ - (60^\circ + 20^\circ) = 180^\circ - 80^\circ = 100^\circ$

45. **Answer: (A)**

Let the sum invested be ₹'P'.

ATQ;

$14552 - P = (P \times 18.2 \times 4.5) \div 100$

Or, $14552 - P = 0.819P$

Or, $14552 = 1.819P$

So, $P = (14552/1.819) = 8000$

So, sum invested = ₹8,000

46. **Answer: (A)**

Let the initial investment of Kevin and Ben be ₹'4y' and ₹'5y', respectively

Increased investment of Kevin = $4y \times 1.25 = ₹'5y'$

Increased investment of Ben = $5y \times 1.2 = ₹'6y'$

So, respective ratio of annual profit shares of Ben and Kevin = $(5y \times 6 + 6y \times 6) : (4y \times 6 + 5y \times 6)$

= $11y:9y = 11:9$

47. **Answer: (D)**

According to the question,

$(a + b)^2 = 8^2$

Or, $a^2 + b^2 + 2ab = 64$

Or, $a^2 + b^2 + 20 = 64$

So, $a^2 + b^2 = 64 - 20 = 44$

48. **Answer: (B)**

$16\frac{2}{3}\% = \frac{50}{3}\%$

Amount spent on food = $75000 \times (50/300) = ₹12,500$

So, remaining income = $75000 - 12500 = ₹62,500$

Amount spent on Rent = $62500 \times 0.6 = ₹37,500$

Remaining income = $62500 - 37500 = ₹25,000$

So, amount saved = $25000 \times 0.44 = ₹11,000$

49. **Answer: (A)**

We know that $\tan \theta = (\text{Perpendicular/Base})$

And, $\tan A = (24/7)$

So, Perpendicular = 24 and base = 7

So, hypotenuse = $\sqrt{(24^2 + 7^2)} = 25$

And, $\sec \theta = (\text{Hypotenuse/base})$

So, $\sec^2 A = (25/7)^2 = (625/49)$

50. **Answer: (B)**

We know that,

$\left(x - \frac{1}{x}\right)^2 = x^2 + \frac{1}{x^2} - 2$

Or, $\left(x - \frac{1}{x}\right)^2 = 38 - 2$

Or, $\left(x - \frac{1}{x}\right)^2 = 36$

So, $\left(x - \frac{1}{x}\right) = 6$

Cubing both sides, we get

$x^3 - \frac{1}{x^3} - 3x \cdot 6 = 216$

$x^3 - \frac{1}{x^3} = 234$

General Awareness

51. **Answer: (B)**

The first joint military exercise 'FRINJEX-23' between the Indian Army and the French Army has been conducted at **Pangode Military Station, Thiruvananthapuram, Kerala.**

The theme for the exercise is "Humanitarian Assistance and Disaster Relief Operations in a Contested Environment".

52. **Answer: (A)**

75. **Answer: (A)**
In the literal sense, **quo-warranto** means 'by what authority or warrant'.
It is a writ issued with a view to restraining a person from holding a public office to which he is not entitled. Quo warranto is a special form of legal action used to resolve a dispute over whether a specific person has the legal right to hold the public office that he or she occupies.
The writ requires the concerned person to explain to the Court by what authority he holds the office. If a person has usurped a public office, the Court may direct him not to carry out any activities in the office or may announce the office to be vacant.

English Language

76. **Answer: (B)**
DESTROY means to ruin or demolish. CREATE (build; invent) will be its antonym. Thus, B is the right answer.

Soar - fly; rise. Execute - carry out. Explain - describe.

77. **Answer: (C)**

The idiom HIT IT OUT OF THE PARK means to succeed brilliantly. Thus, A is the right answer.

None of the other options correctly conveys the meaning of the idiom.

84. **Answer: (B)**
In B, replace the plural verb HAVE with the singular HAS as the subject BUILDING is singular. Thus, B is the right answer.

85. **Answer: (D)**
The sentence is grammatically correct and free of error. Thus, D is the right answer.

86. **Answer: (B)**
We need the past tense form of a verb, as the sentence talks about an event in the past, to come after the subject pronoun SHE. The sentence seeks to convey that the person travelled around the United Kingdom with a youth orchestra. TOURED (travelled around a place) will fit here. Thus, B is the right answer.

The remaining options are contextually incorrect.
SEIZED - took something by force.
ADAPTED - changed according to the environment or situation.

LEAPED - jumped high.

87. **Answer: (D)**
We need the past participle form of a verb to complete the past perfect tense structure HAD + VERB. The sentence seeks to convey that the person had made the choice to make a career in music. DECIDED (made a choice about what to do) will fit here. Thus, D is the right answer.

The remaining options are contextually incorrect.
CREATED - made something.
IGNORED - refused to give attention or acknowledge.
COMPLAINED - expressed annoyance or dissatisfaction about something or someone.

88. **Answer: (C)**
We need a verb that is similar in form to the verb AUDITIONED, as verbs joined with AND are similar in form. The sentence seeks to convey that the person gained one of the highest marks. SCORED (gained marks in a test) will fit here. Thus, C is the right answer.

The remaining options are contextually incorrect.
DISTRIBUTED - divided something among many people.

MEASURED - found the size or quantity of something.
HOSTED - organised an event.

89. **Answer: (A)**
We need the past participle form of a verb to complete the past perfect tense structure HAD + VERB. The sentence seeks to convey that the person had succeeded in getting most of the top awards. CAPTURED (succeeded in getting something that other people were also trying to get) will fit here. Thus, A is the right answer.

The remaining options are contextually incorrect.
SLICED - cut into thin pieces.
QUELLED - completely stopped something.
NUDGED - gently persuaded someone to do something.

90. **Answer: (C)**
We need the base form of a verb to follow the modal verb WILL NOT. The sentence seeks to convey that Evelyn will not agree to take any indication that she has made heroic achievements. ACCEPT (to agree to take something) will fit here. Thus, C is the right answer.

The remaining options are contextually incorrect.
 CONVINCED - to make someone believe that something is true.
 FORGIVE - to stop blaming someone or being angry with someone.
 THREATEN - to say that one will cause harm or do something unpleasant.

91. **Answer: (C)**
 PASS UP (give up) will fit here as the sentence talks about how he did not regret giving up the chance to work abroad at the cost of being near to his family. Thus, C is the right answer.
 Pass away - die. Pass out - faint. Pass off - misrepresent.
92. **Answer: (B)**
 HANG OUT (to spend time with someone in a relaxed or casual way) will fit here contextually as the sentence tells us how the speaker used to spend his free time at the mall. Thus, B is the right answer.
 Hang on - to wait. Hang up - to end a phonecall. Hand in - submit.
93. **Answer: (C)**
 QPSR is the correct order of the sentences. QP is a mandatory pair. Q begins the paragraph by telling us that resources are very important for developmental activities, and P follows and presents a contrast by telling us that injudicious use or overuse of resources can cause socio-economic and environmental problems. SR is another mandatory pair. S follows P because it continues to talk about the problems mentioned in P and states that resource conservation is the way to overcome them, and R follows S and builds on the information mentioned in S by telling us that the importance of resource conservation prompted many leaders and thinkers to express their concerns about it. Thus, C is the right answer.
94. **Answer: (B)**
 The sentence is in direct speech. Follow the instructions to change the sentence to indirect speech:
 I. Remove the comma and inverted commas.
 II. SAID TO will be replaced by TOLD. Add THAT after the reporting speech clause, "SAMRIDDHI TOLD ME."
 III. The present continuous tense construction AM TRYING will change to the past continuous WAS TRYING.
 IV. The first person pronoun I will change to the third person pronoun SHE.
 V. The first person possessive adjective MY will change to the third person possessive adjective HER.
 Thus, B is the right answer.
95. **Answer: (B)**

(B) is the correct answer. The sentence is in the passive voice. The rules to change the passive voice to active are given below:

- I. The object clause will become the subject clause. Here, the subject A TEAM OF DETECTIVES will become the object and the object THE POLICE will become the subject and begin the sentence.
 II. Replace HAS BEEN TAKEN with HAS TAKEN.
 III. Remove the conjunction BY before THE POLICE.
96. **Answer: (A)**
 RAN INTO (encountered) will fit here as the sentence talks about how the speaker met Rakesh on his way back home. Thus, A is the right answer.
 Ran down - belittled. Ran out of - to suffer a lack of. Ran up - allowed a debt or bill to accumulate.
97. **Answer: (C)**
 The sentence is in the indicative mood, simple past tense, and active voice. To change the sentence to the passive voice, follow the rules below:
 I. The object clause will become the subject clause. The object "YOUR NEW RECIPE" will become the subject of the sentence and start the sentence.
 II. The verb COOKED will change to WAS COOKED, as the passive construction for the simple past tense in the indicative mood is WAS/ WERE + PAST PARTICIPLE.
 III. The preposition BY will be added to the sentence, and I will change to ME and become its object.
 Thus, C is the right answer.
98. **Answer: (D)**
 A person who can read and write is called a literate person. Thus, D is the right answer.
 Epitaph - words on a tombstone. Volunteer - one who works for free. Sacrilege - violating the sanctity of a religious place.
99. **Answer: (B)**
 We need the past participle form of a verb to complete the present perfect tense structure HAS + VERB. The sentence talks about the person who has climbed the top of Mount Everest twice. SCALED (climbed to the top of something) will fit here. Thus, B is the right answer.
 The remaining options are contextually incorrect.
 DELIVERED - took something to someone.
 ENCOURAGED - motivated someone to do something.
 LIFTED - raised something to a higher position.
100. **Answer: (B)**
 We need a base form verb to fit in the TO + VERB infinitive construction. PREVENT (hinder) will fit here contextually as the sentence talks about how the army had been kept small in size to avert abuses of power by the king. Thus, B is the right answer.
 Praise - appreciate. Permit - allow. Perish - die.
